

VOLCANO participates in the Exhibition, “Nor-Shipping 2019”

VOLCANO participates in the exhibition “Nor-Shipping 2019” held at Norway trade fairs, from 4th June to 7th June 2019. VOLCANO welcomes all the respective visitors in Japan booth.

Nor-Shipping 2019

Period :	from 4 th June 2019 to 7 th June 2019
Location :	Lillestrom (skirt of Oslo city), Norway
Venue :	Norway Trade Fairs
Booth No. :	B02-08 (JSMEA booth in Japan Pavilion)
URL :	http://nor-shipping.com/

Nor-Shipping 2019 is an international big maritime event for maritime industry players. More than 900 companies from 48 countries will join this exhibition. We expect that the LNG industry will expand rapidly and widely in order to meet stricter regulations and increasing supply of fuel gas.

VOLCANO contributes reducing emission of Methane, which is contained in boil off gas inside of the LNG tank, into the atmosphere by delivering the gas combustion unit called “MECS-GCU” to the Japan’s first LNG fueled vessel, and keeps working on introduction project of LNG fueled vessels. As fruits of VOLCANO's "Environmental load reduction technology", which is based on over 38 years' experiences and the sales records of marine-use Dual-Fuel (Gas/Oil) burner for around 190 vessels, our Gas/Oil simultaneous mixed combustion DF boiler-burners called “Vignis” have been delivered to the world’s first LNG fueled PCTC and the world’s first new-building LNG bunkering vessel. Also, our Gas/Oil simultaneous mixed combustion DF boiler-burners called “SFFG-II” have been delivered to LNG fueled aframax tankers.

VOLCANO proposes our "Environmental load reduction technology" for LNG utilization in order to "Keep Sky Blue" and "Keep Sea Clean".

Please come and visit us!
