Press Information

VOLCANO has the experience at Gas/Oil combination combustion in Industrial equipment category. Based on the experience in Industrial equipment, VOLCANO has records in Shipboard equipment category as a supplier of "Gas/Oil Combination burner" for Main-boiler/Auxiliary-boiler for more than 36 years. VOLCANO "SFFGII" is known as the Gas/Oil combination burner for Main-boiler of LNG Carriers.

In 2016, VOLCANO launched two new products for LNG fueled vessel, "Boil Off Gas Combustion Unit MECS-GCU" and "Gas/Oil combination burner Vignis-mini".

These products are already installed in the LNG fueled vessel projects, such as the Japanese first LNG fueled vessel, the world's first LNG fueled Pure Car Carriers, a LNG Bunkering Vessel and got good reputations from the customers.

VOLCANO will play a role on enhancing the LNG fuel use technology.
